

ANOVA Warmup

Jack Ruder

Oct 14, 2022

5.1

True

5.15

a

Response is the Final exam score. Explanatory is the font used.

b

This is a randomized experiment, since fonts were assigned at random, by the teacher.

c

The students in the class were not cherry-picked for the experiment, so an analysis of covariance should be fine.

5.17

a

The units in this experiment are the students.

b

The treatment is which font is assigned.

c

Each of the 40 fonts should be assigned to the same number of students.
